- Portfolio: www.mfundodev.com

.NET DEVELOPER (FULL-STACK .NET & REACT)

Results-driven developer with two years of software development work experience. Successfully delivered real industry projects for satisfied clients. Seeking a position as a Junior Full-Stack Developer where I can leverage my expertise in designing and building custom software solutions across web, mobile, and desktop platforms.

Skilled in JavaScript (React, React Native) for frontend. C# (.NET framework) for backend development with a commitment to delivering high-quality solutions that exceed client expectations. Brings strong work ethic, adaptability, and practical problem-solving skills from previous roles in various industries.

I am a citizen of Eswatini and available for remote, hybrid, and on-site work. I am open to full-time, contract, and independent contractor opportunities. I am currently based in Gauteng and hold a valid, active passport.

SKILLS

Programming Languages;

- C# / .NET
- Python (Django)
- JavaScript
- SQLs databases (PostgreSQL and SQLite)

Web Development;

- HTML5 & CSS3
- React, Blazor
- WordPress

Mobile & Desktop;

- React Native (with koltin on Android configurations and Swift on IOS configurations) cross-platform mobile application

- Electron.js and Blazor for cross-platform desktop apps

Backend & Cloud

- ASP.NET (Kestrel web server, ASP.NET Core Web API, Blazor) for enterprise-grade
- AWS (Amplify for full-stack hosting, EC2 for custom servers)
- Contabo (VPS hosting for Docker, NGINX, custom servers)
- RESTful APIs (Swagger/ JWT / Auth) for secure integration and communication.

Additional Skills

- Django (Gunicorn, Django rest framework, Django Auth)
- Microsoft Azure for scalable cloud solutions
- The ability to work as a team
- Admin skill and customer care skills

PROFESSIONAL EXPERIENCE

November 2025 - current {remote}

WEB DEVELOPER at Rad Apple Studio

I work as independent contractor on a contract for a wab developer role.

Responsibilities:

- Develop websites with WordPress
- Deliver in time and make sure it accoeding to the clients desires
- Update on going website
- E-commerce websites with woocormerce

FREELANCE (2024 – CURRENT) {remote}

Freelance Developer

Successfully designed and built custom and enterprise software solutions for 15+ clients across multiple platforms, maintaining a 100% client satisfaction rate.

- Developed 12+ full-stack applications for web, mobile, and desktop
- Implemented backend services using C# (.NET framework) and Python (Django framework)
- Collaborated with clients to define requirements and deliverables

- Managed project timelines and deployment processes
- Maintained long-term relationships with clients for ongoing support and enhancements
- Registered with freelance platforms to expand client base

2023 Self-Taught Software Development

Dedicated to learning programming through online resources including W3Schools, YouTube tutorials, and other online platforms.

- Acquired foundational knowledge in programming concepts and web technologies
- Developed basic applications to practice and reinforce learning
- Built a strong foundation for formal education and freelance work

2021 - 2022 Self-Employed Welder & Woodworker

Managed own business providing welding and woodwork services to various clients.

- Designed and fabricated custom metal and wood products
- Managed client relationships and project requirements
- Developed strong problem-solving and project management skills

2019 - 2020 Maintenance Worker

Bulembu Lodge Eswatini (Swaziland)

Performed maintenance duties including welding and general repairs, utilizing practical skills to maintain facility operations.

- Conducted routine maintenance and repairs on facilities and equipment
- Utilized welding skills for various maintenance projects
- Collaborated with team members to complete tasks efficiently

2017 - 2018 General Worker

Premier Bakery Eswatini (Swaziland)

Assisted in various general tasks throughout the bakery operations, demonstrating adaptability and teamwork.

- Supported bakery operations across multiple departments
- Maintained cleanliness and organization in work areas
- Adapted to various tasks as needed to support team objectives

EDUCATIONAL BACKGROUND

Year	Institution	Qualification Obtained
2025	Microsoft	Full-stack developer professional certificate
2025	IBM	Full-stake developer professional certificate
2024-	Regenesys Institute	Bsc Computer Science (not yet complete, paused due to financial constraints)
2015	Malindza Secondary School	International Certificate Of Secondary Education

OTHER CERTIFICATES

- Team impact theology

LANGUAGE SKILLS

Languages	Speak	Read	Write
English	Good	Good	Good
Siswati (Home language)	Good	Good	Good
Sepedi	Good	Good	fair
Isizulu	Good	Good	Good
Isixhosa	Good	Good	fair

PROJECTS

Portfolio: Visit https://www.mfundodev.com/

Project Categories;

- Mobile Applications - Cross-platform mobile apps with React Native
- Websites & Web Applications - Responsive, modern websites with custom CMS
- E-commerce Platforms - Complete online stores with payment integration
- Desktop Applications - Cross-platform solutions with Electron.js
- Custom Business Solutions - Tailored software for specific

Some of the projects:

Enterprise Communication App -TeamKonekt

Link: www.teamkonekt.com

Summary/Description:

Solo-built enterprise communication app (mobile APK + desktop web) that centralises reports, tasks, project tracking, announcements and suggestions to improve accountability and internal communication for small–medium businesses.

Tech stack:

.Net (ASP Core), PostgreSQL, React (desktop), React Native (mobile), Kestrel, Nginx, Certbot (SSL), VPS (Contabo), basic firewall configuration.

Responsibilities & highlights:

- Sole architect & developer — owned the project end-to-end: requirements, system design, backend, front-end, deployment and maintenance.
- Backend — built RESTful APIs using .NET and RESTful services; implemented authentication, permissions and data models for reports, tasks, projects, announcements and suggestions.
- Frontend (Web & Mobile) — implemented responsive desktop UI with React and cross-platform mobile client with React Native; ensured feature parity between platforms.
- Deployment & DevOps — Provisioned a Contabo VPS, deployed ASP.NET Core applications using Kestrel, configured NGINX as a reverse proxy, automated HTTPS with Let's Encrypt (Certbot), and applied firewall and hardening rules to ensure production-grade security, performance, and high availability.
- Database — designed and managed relational schema with PostgreSQL for reliable transactional storage and reporting.
- Release — packaged and published mobile client as an APK for distribution to client devices.
- Product focus — translated a real client pain point (lack of communication/accountability at The Groom Boutique) into a working product that supports reporting, attendance, task/project tracking and internal suggestions.

Bible School Custom Software — Global Student & Missionary Network

Link: https://bbm.207-180-201-93.sslip.io/

Summary / Description:

Solo-built .NET + React platform connecting a Bible school's partners, missionaries, current students and alumni worldwide — supporting announcements, testimonies, prayer points, online donations and a student portal.

Tech stack: .NET (backend), React (frontend), JWT (authentication), Contabo (VPS / hosting).

Responsibilities & highlights:

- End-to-end ownership — acted as sole architect and developer: requirements gathering, system design, backend, frontend, deployment and maintenance.
- Backend — developed RESTful services with .NET, modelling users (admins, students, missionaries, alumni), posts (updates, testimonies, prayer points), donations and student-portal data.
- Authentication & security — implemented stateless authentication and authorization using JWT, session handling and role-based access for admin vs student capabilities.
- Frontend (Web) — built a responsive React interface for administrators, students and alumni to post updates, view testimonies, submit prayer points, donate and access student resources.
- Student portal — implemented a dedicated portal for active students: course/notice access, submission points, and communication channels with missionaries and school staff.
- Deployment — provisioned and deployed the application on a Contabo VPS for production use.
- Product impact — enabled global connectivity between the school and its field workers and alumni, increasing transparency and allowing remote giving and spiritual support.

FindTaxi — Ride-hailing Mobile App

Link: www.findtexi.com

Summary / Description

Solo-built ride-hailing mobile app (APK) that connects taxi drivers and passengers, shows live distance to nearby taxis, enables calls/messages and community engagement, and supports parcel deliveries secured by a pickup code.

Tech stack: Django, Django REST Framework, React Native (mobile), Google Places API, PostgreSQL, Contabo (VPS), APK release.

Responsibilities & highlights:

- End-to-end ownership — sole architect and developer: product design, backend, mobile frontend, deployment and APK release.
- Real-time UX — implemented distance/proximity features so passengers can see how close taxis are and head to the nearest taxi station when a driver is nearby.
- Backend — built RESTful APIs with Django + Django REST Framework to manage users (drivers/passengers), rides, parcel orders, messaging and notifications.
- Mobile client — built the cross-platform mobile app in React Native with smooth UX for ride requests, driver tracking, in-app calls and messaging.
- Maps & places — integrated Google Places API for address search, station lookup and improved pickup/dropoff accuracy.
- Parcel delivery — added parcel booking workflow using one-time pickup codes for secure handover and tracking.

- Communication & engagement — implemented in-app calling, messaging and community features to improve coordination and trust between drivers and passengers.
- Deployment & release — deployed backend on a Contabo VPS and published the mobile client as an APK for distribution.
- Product impact — addressed long passenger wait times by enabling proactive pickup decisions and better communication between riders and drivers.
